

FOR IMMEDIATE RELEASE

More Product Lines, Applications, Images and Value-Added Features Now Available through Epicor eCatalogs

LAS VEGAS, November 1, 2011 – [Epicor Software](#) Corporation (recently combined with Activant Solutions Inc.), a global leader in [business software solutions](#) for manufacturing, distribution, retail and services organizations, has announced that its industry-leading suite of automotive and medium-duty replacement parts electronic catalog products now features significantly more product lines, coverage, part images and additional business tools to support aftermarket distributors, jobbers and service providers.

The company's popular Epicor® [LaserCat® 3](#) eCatalog now includes a comprehensive "Powersports" database covering tens of thousands of parts and related products for motorcycles, all-terrain vehicles, motor scooters, personal watercraft, and snowmobiles. The addition of this extensive new data set enables users to increase sales and profits by expanding into a market noted for high levels of do-it-yourself maintenance and related care. Among the Powersports products included in the catalog are spark plugs, filters, belts, batteries, and lighting products.

Epicor also has expanded its automotive replacement parts database to cover an array of exotic vehicles, including Bentley, Ferrari, Maserati, Rolls Royce, and similar models not carried in other traditional auto parts eCatalogs.

In addition, the company has significantly expanded the Epicor® ItemExpert™ eCatalog module of non-application and universal products. This exclusive resource now covers more than 200 product lines and nearly 210,000 individual items. More than 40,000 of these products -- ranging from tools and chemicals to welding equipment and tire and wheel accessories -- are presented with detailed images to help users close more sales.

"We continue to invest in resources to add value to each of our eCatalog products," said Paul Magin, senior director, content and connectivity for Epicor. "The Epicor® [PartExpert® suite](#) is much more than a set of look-up tools -- we have built significant new content and functionality into our catalog interfaces to help users be more productive, accurate and, above all, profitable, on the job each day."

This increased value can be seen in increased eCatalog use as well. The Epicor® [Cover-to-Cover™](#) graphical eCatalog module, as one example, now regularly exceeds 15 million user hits per month, up

from 11 million monthly hits in late 2010. Now used in thousands of distributor, jobber and vehicle service locations, Cover-to-Cover includes more than 4 million part images, diagrams, MSDS sheets, technical bulletins, installation instructions, and specification listings. The module is available for the full suite of PartExpert eCatalog products, including LaserCat 3, Epicor® ePartExpert®, Epicor® [ShopCat®](#), and the Epicor® [Integrated Service Estimator®](#) solution.

For additional information regarding Epicor electronic catalog products for the aftermarket, please visit the company's AAPEX booth (#2234) in Las Vegas, contact your Epicor representative, call (800) 380-9015, or email automotive.marketing@epicor.com.
