

FOR IMMEDIATE RELEASE

NCAB Group Continues Epicor iScala Roll-Out in Five New Countries*Starting Implementations in Spain, Norway, France, Russia and China*

Stockholm, Sweden, 13 October 2011 -- [Epicor Software](#) Corporation, a global leader in [business software solutions](#) for manufacturing, distribution, retail and services organizations, today announced that NCAB Group, one of the leading European PCB producers, has expanded its roll out of Epicor iScala® enterprise resource planning (ERP) system in Europe. NCAB Group already uses the Epicor® solution in Sweden, Finland, Denmark, UK, Poland, Macedonia, and Germany.

“We have been using iScala for a long time because we can easily take the system with us when we open up companies in new markets,” said Magnus Jacobsson, IT Manager for NCAB Group. “iScala handles languages and currencies which is important to us as an international business with global customers, and the entire solution fits our business model well, with no need for customizations.”

NCAB Group also uses Epicor’s business integration platform, [Epicor Service Connect](#), to integrate systems not only inside the company but also with external parties. “We have recently experienced growing demand from our customers to be able to integrate our ERP system with the systems they are using, so that we can fully automate the order and delivery process,” says Jacobsson. “With the use of Service Connect this is easy and we have a fully automated process with several larger customers where orders, invoices, delivery and post-sales service details are handled without any manual input. This has made us more competitive and we can see many further benefits by extending our use of Service Connect across the organization.”

Epicor iScala is especially designed for companies that have significant cross-border trading requirements because it combines country-specific localizations and multi-language capabilities with leading capabilities to support global, multi-company or multi-site business models that need to collaborate with customers, suppliers, sister organisations or other partners. “iScala has always been one of the top ERP systems of choice for global companies because it helps them keep costs low while enabling them to comply with local regulations wherever they are located,” said Stefan Westelius, vice president, sales for Epicor.

About Epicor Software Corporation
