

NASHVILLE, TN – INSIGHTS 2017, May 23, 2017

Latest Version of Epicor ERP Extends Manufacturing Leadership with Launch of Powerful Cloud-Based Analytics and Global Electronic Compliance

Unveiled at its [Insights 2017](#) customer conference today, Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, has introduced the latest version of Epicor ERP, the global enterprise resource planning solution in use today by thousands of customers in 150 countries worldwide.

Building on the strengths of its cloud-first architecture, the latest release provides powerful new capabilities to support operational excellence, improved visibility, and revenue expansion—critical to achieve sustained growth in the increasingly competitive and fast-paced global business arena, with new functionality to support top-line revenue growth while controlling bottom-line costs.

“With margins for products eroding, customer demands increasing, and an uncertain and somewhat unstable global economy, manufacturers need to use technology to increase their business agility, and enable strategic decision-making,” said Scott Hays, senior vice president, product marketing, Epicor. “Designed to support how people work, today and in the future, Epicor ERP helps businesses make the most of technologies such as the Internet of Things, big data and analytics, social collaboration, mobility and additive manufacturing.”

Epicor ERP now provides greater cloud deployment flexibility and new and enhanced business functionality out-of-the-box, including new capabilities to support global growth and expansion, business transformation, and efficiencies in mission-critical operations such as quality and compliance. The new release also features fully integrated enterprise content management capabilities from the company’s January 2017 acquisition of [DocStar](#). These new competencies support business transformation initiatives focused on improved customer-centricity, collaboration, efficiency and expansion to address new market opportunities.

Available now in 36 languages for upgrades and new cloud deployments worldwide, businesses using the latest version of Epicor ERP will benefit from the following features:

“Upgrading to the latest version of Epicor ERP not only ensures we are running the absolute best version of the software, but it also allows our business to take advantage of the latest features that enables us to grow our business by giving users the freedom to focus on core business responsibilities,”

Daniel Sirow
Vice President
Independent Components Corporation

- **New dedicated tenancy cloud option:** In addition to multi-tenancy and single-tenancy deployment options, the new dedicated cloud option offers greater flexibility and control.
- **International financial and compliance capabilities:** Expanded international financial applications and a new electronic compliance engine to ease the reporting, tax and payment processing complexities of operating in multiple geographies.
- **New data analytics packages:** Epicor Data Analytics (EDA) offers flexible and easy-to-use analytics tightly integrated with Epicor ERP. Via configurable dashboards, EDA drives data visibility, for improved decision making.
- **New tools for greater productivity in front and back-end processes:** A new 2D Design Visualization Tool enhances the Epicor ERP configure-to-order design function. New functions have also been added to Epicor Manifest—the automated shipping software.
- **New resources streamline upgrades and support training:** New tools, including the Epicor Site Analyzer and a new rapid data migration option accelerate the upgrade process for customers transitioning from on premise to cloud deployment models. [Epicor University](#) also offers education and training on the new ERP functionality.

According to Epicor customers, upgrading to the latest version of Epicor ERP helps to ensure their companies are running the absolute best version of the software. “It allows our business to take advantage of the latest features that enable us to grow our business—giving users the freedom to focus on core business responsibilities,” said Daniel Sirow, vice president, [Independent Components Corporation](#), a wholesale distributor of OEM quality aftermarket air compressor parts and accessories.
