

INSIGHTS 2016 - LAS VEGAS, April 19, 2016

### **Epicor Entices New Customers with Enriched ERP**

#### ***Latest Release Expands Functionality and Offers Flexible Deployment Options***

Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, today announced Atlas Minerals & Chemicals Inc., CJT Koolcarb Inc., Integrated Biometrics, Ironrock Insurance Company, LH Industries, Magnus Engineered Equipment, Seegrid Corporation, Trueline Valve Corporation, Vossen Wheels to name a few have selected its award-winning [enterprise resource planning \(ERP\)](#), Epicor ERP.

#### **Epicor ERP Enables and Supports Growth**

Epicor ERP offers key manufacturing and supply chain tools built to simplify the end user experience. A world leader in the design and manufacturing of progressive stamping dies and industrial control systems, [LH Industries](#) recently chose Epicor ERP.

“LH Industries was using separate ERP systems, and we wanted to unify our team to create a better operating environment,” said Stephanie Naish, manager of cost accounting, LH Industries. “We evaluated several ERP systems over the course of a year, and we chose Epicor because we felt their technology could grow with our organization, as opposed to us growing out of the system.”

The latest version of Epicor ERP, [announced in March 2016](#), comes with hundreds of enhancements to support essential manufacturing-related tasks, including inventory and material management, purchasing, shipping and receiving, quality assurance, project management and job scheduling, sales and CRM, quoting and order management, and country-specific functionality, among others.

Naish continued, “The company’s flexibility, customer service, and partnership program were also key selling features of Epicor, and the team at LH Industries is looking forward to having real-time data available for job tracking and costing, improving our record of on-time delivery, and enabling better customer communication.”

“Our commitment to providing industry-leading technology paired with world-class service makes it possible for our customers to focus on other aspects of their business... Epicor ERP is designed to flexibly meet and exceed the needs of today’s complex manufacturing organizations and accommodate our customers as they grow.”

## **Epicor ERP Cloud Deployments Accelerate Implementation**

In addition to hosted and on-premises deployments, Epicor makes it easy for new customers to quickly take advantage of its ERP solution using cloud technology, which accelerates implementation while offering value-added services to ensure scalability, security, and business continuity as an organization needs them.

“We looked at five ERP offerings,” said Jeffrey Mendrala, chief financial officer at [Magnus Engineered Equipment](#). “We needed a solution that could be configured, operational, and implemented in an extremely short time frame and capable of growing with us. Epicor Cloud ERP was the right choice.”

Backed by more than forty years of industry expertise, Epicor ERP is a powerful solution that supports manufacturers across the entire supply chain. “Our commitment to providing industry-leading technology paired with world-class service makes it possible for our customers to focus on other aspects of their business,” said Malcolm Fox, vice president, product marketing, Epicor. “Whether it’s deployed in the cloud or on premises, Epicor ERP is designed to flexibly meet and exceed the needs of today’s complex manufacturing organizations and accommodate our customers as they grow.”

## **About Epicor ERP**

Ideal to support make-to-order, configure-to-order, and configure-to-stock manufacturing and guided by the needs of today’s users, Epicor ERP is a global enterprise resource planning solution that delivers the choice, flexibility and agility to drive growth and opportunity throughout your business without the complexity of legacy platforms. A single, end-to-end software solution for business, Epicor ERP is available in the cloud, hosted, or on-premises.
