

FOR IMMEDIATE RELEASE

Epicor Payment Exchange Credit Card Processing Solution Now Available to Users of Epicor Vision Software

***One of the Nation's Fastest-Growing Processing Options
Helps Automotive Aftermarket Businesses Save Time and Reduce Costs***

Austin, Texas, November 3, 2015 -- Epicor Software Corporation, a global leader in [business software solutions](#) for manufacturing, distribution, retail and services organizations, today announced that the [Epicor® Payment Exchange™](#) credit card processing solution can now be integrated with [Epicor Vision™](#) distribution management software for the automotive aftermarket. The solution is also available for users of [Epicor Eagle® for the Aftermarket](#) software.

The Epicor Payment Exchange solution is a convenient, secure service that helps aftermarket parts distributors, jobbers and retailers simplify payment processing and reduce the costs associated with many third-party providers. With more than 70 million transactions and \$4 billion in payment card volume under management, the solution has been ranked for the second consecutive year as the nation's fastest organically growing payment processor by [The Nilson Report](#), a leading source of payment industry news and statistics.

Epicor Payment Exchange handles each step in credit card transactions—authorization, settlement and reporting. Because it is used by thousands of merchants whose warehouses and stores are powered by Epicor business management solutions, the payment processing service enables users to benefit from significant volume discounts that often are not passed along by some other processing firms.

“We are pleased to bring the significant benefits of this payment solution to the growing number of leading aftermarket distributors pursuing aggressive growth strategies through the use of Epicor Vision software,” said Scott Thompson, vice president, automotive, analytics and content, Epicor Americas. “Many of our Epicor Eagle users have found that integration of this solution not only helps them save time and improve the customer experience, but also significantly reduces their processing fees.”

In addition, the Epicor Payment Exchange solution helps streamline back-office processes. Businesses can view recent transactions in their own browser-based dashboards without waiting for monthly statements, and accept credit card payments—or process refunds—on a remote basis using virtual terminals or Web-connected browsers. The Epicor Payment Exchange service can also improve business reporting and payment reconciliation by helping users accurately deposit and reconcile funds.

To learn more about the Epicor Payment Exchange solution and to sign up for a free technology consultation, please visit the Epicor booth 2238 during AAPEX, call 888.463.4700, or email automotive.marketing@epicor.com.
