### Solarvest Selects Epicor ERP to Support Regional Expansion

***Leading solar power player in Malaysia moves into new regional markets with industry-specific enterprise software from Epicor***

Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, today announced that [Solarvest Energy Sdn Bhd](#), Malaysia's leading high-yield solar photovoltaic (PV) system provider, has chosen the latest version of Epicor ERP, the global enterprise resource planning (ERP) solution, to support business growth.

A subsidiary of Atlantic Blue Sdn Bhd, a leader in turnkey engineering, procurement and construction (EPC) solutions for large scale solar farming, Solarvest pioneered the installation of solar panels for residential, commercial, and industrial properties in Malaysia. Formed in 2012 with only four staff, Solarvest has since grown into a formidable solar power player with offices located in Selangor, Penang and Kedah. Solarvest expects sales to double this year, and is on the cusp of expanding into Southeast Asia.

This vast and rapid expansion required Solarvest to streamline its business operations and processes. With no existing automated system in place, human errors were common, and it was difficult for different departments to communicate and collaborate on projects. As a result, Solarvest decided to look for a new platform to simplify and automate engineering processes, as well as replicate and improve upon the Malaysian business model across Southeast Asia.

"We explored different options and decided on Epicor for its expertise in engineering services, as well as its stellar track record in this industry. Epicor ERP is highly customisable, allowing us to specify and adapt business processes quickly, which is imperative for our business to expand successfully," said Davis Chong, managing director of Solarvest.

He continued, "We are now in the digital era, and businesses must fully utilise technology to increase business agility, enable insightful decision-making and achieve greater gains. Beyond enabling greater efficiency and productivity for Solarvest today, we are confident that Epicor ERP will provide the foundation for us to take advantage of newer technologies such as big data and analytics far into the future."

Vincent Tang, regional vice president for Epicor Software in Asia said, "Solarvest face some

significant challenges, specifically around visibility and efficiency. To help them meet these challenges we focus on delivering a solution that not only will address the specific requirements and challenges posed by its industry, but was also easy to deploy, operate, manage and upgrade. I am confident that Epicor ERP will provide Solarvest with the flexible and scalable platform they need to continue to grow its business in the region.”

### **About Epicor Software Corporation**

Epicor Software Corporation drives business growth. We provide flexible, industry-specific software designed around the needs of our manufacturing, distribution, retail, and service industry customers. More than 40 years of experience with our customers’ unique business processes and operational requirements are built into every solution—in the cloud, hosted, or on premises. With this deep understanding of your industry, Epicor solutions manage complexity, increase efficiency, and free up resources so you can focus on growth.
