### Howell Selects Epicor ERP to Help Achieve Growth Goals

***Leading low voltage solutions provider selects Epicor ERP to streamline operations and deliver powerful analytics required to accelerate business growth in India***

Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, announced today that [Howell Protection Systems \(India\) Pvt. Ltd.](#), a leading system integration business in India, has selected the global enterprise resource planning solution [Epicor ERP](#), to increase visibility, transparency and information exchange across the organisation. The solution will provide data-rich, real-time reporting—promote smarter working, support better decision making, and drive business growth.

[CorporateServe Solutions Pvt. Ltd.](#), an authorised channel partner in India, will lead the implementation.

Howell Protection Systems India Pvt. Ltd. offers low voltage turnkey solutions in fire, safety, security, building automation, IT and audio-visual technologies. Its customised solutions help its customers to safeguard their premises and intellectual property, and also increase connectivity and productivity.

Previously Howell was using various independent software and systems to manage their business processes. This led to a lack of collaboration among departments, causing delays in business operations. Howell realised that to meet its growth ambitions through acquisitions and expand into new business verticals, it required a global ERP system with strong reporting and powerful analytics tools.

“With our future growth plans and business expansion, it became imperative to deploy a strong backend system to align the different processes with the organisation’s long term objectives,” said Syed Ishtiyaq, general manager at Howell India. “After evaluating other ERP solutions we found Epicor ERP to be the most suitable to fulfill our requirements, enabling us to access cutting-edge technology anywhere and on any device, and seamlessly integrate with third party applications, as required.”

“We’re delighted Howell has chosen Epicor ERP to take its business to the next level,” said Sabby Gill, executive vice president, international, Epicor Software. “Howell is a strong example of the increasing number of ambitious businesses in India that are choosing to replace their legacy systems

*“After evaluating other mid-range ERP solutions we found Epicor ERP to be the most suitable to fulfill our requirements, enabling us to access cutting-edge technology anywhere and on any device, and seamlessly integrate with third party applications.”*

with modern ERP systems in order to grow into new markets and regions. As a result, Epicor continues to build momentum across India with the support of its trusted channel partners.”

“We understand the challenges that manufacturing & EPC companies face on a daily basis and provide robust ERP functionality with these challenges in mind. Epicor ERP offers a powerful and flexible solution that will help integrate core business functions and streamline processes. With this partnership, Howell will be able to take advantage of key technologies that are vital for business growth,” said Vinay Vohra, founder & CEO at CorporateServe Solutions, Epicor channel partner implementing the solution at Howell Protection Systems.
