Institute of Technical Education Singapore and Epicor Align to Provide Advanced Learning and Research

Students will benefit from use of next generation ERP, internship opportunities, and mentoring from Epicor

Epicor Software Corporation, a global provider of [industry-specific enterprise software](#) to promote business growth, today announced that it will be collaborating with the [Institute of Technical Education](#) (ITE) to use the latest version of the global enterprise resource planning (ERP) solution, Epicor ERP, for research and training purposes.

As part of the relationship, Epicor will provide expertise and support to ITE's students through internship opportunities, student attachment programs, and industry joint projects.

“More millennials are entering the workplace, and they are both technologically proficient and digitally literate. Equipping these students with these relevant experiences and skills will help organisations to adapt and empower their employees to boost collaboration and innovation.”

Vincent Tang
Regional Vice President
Epicor Software Asia

Epicor is showcasing the latest version of its ERP platform via the ITE's Solutions Repository, where opportunities to apply Epicor ERP across different industries can be explored. The partnership will also see Epicor provide mentorship opportunities for aspiring students through talks and forums to tackle real life business challenges.

“Close collaboration between higher education institutions and the industry is essential in preparing students to enter the workforce,” said Vincent Tang, regional vice president, Epicor Software Asia. “By providing access to the Epicor ERP system, students have a chance to apply concepts they learn in a practical and visual manner. This greatly strengthens their ability to explore new business models, and tests their knowledge. At the same time, the Epicor ERP system encourages a self-learning approach, where students are able to innovate and tackle scenarios to increase productivity and develop deeper analytical skills.”

ITE said, “Through this collaboration, our students will benefit immensely from being exposed to the latest digital technologies and will gain additional skills that will enable them to excel in an economy that is undergoing rapid digital transformation. We are excited about partnering with Epicor to ensure our students are well equipped with the right technology and skills to develop pioneering solutions for Singapore's Smart Nation vision. In return, companies can benefit from new ideas and approaches to help them manage complex application environments.”

Tang concluded, “Working together with ITE to nurture this new generation to fully harness technology is very exciting, and we look forward to preparing students for successful careers ahead. More

millennials are entering the workplace, and they are both technologically proficient and digitally literate. Equipping these students with these relevant experiences and skills will help organisations to adapt and empower their employees to boost collaboration and innovation.”
